Lesson #4 - Evan Hilchey

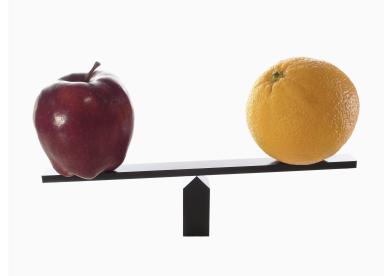

October 27 2020

- Focus of Lesson: IELTS Writing: Describing graphs
- Lesson
 - Lead in
 - Today we're going to continue practicing IELTS Writing Task #1
 - Same graph as last week but you will write new answers and then compare your answers from last week to see how you have improved
 - ▶ We're also going to spend 5 minutes seeking your feedback my teaching
 - Lesson overview
 - Revisit IELTS Writing Task #1 activity and tips
 - Activities
 - IELTS Writing Task #1 <u>https://forms.gle/FJ7orhM4ic9b7Xhr9</u>
 - Teacher feedback survey <u>https://forms.gle/buxPGGBkwYx1mLGe8</u>
 - Students to compare their answers from last week (students will be provided with links to view their answers from from Oct 19/27).
 - Wrap-up
 - What have you learned about writing IELTS Task #1

IELTS Writing Task #1: Comparing your Writing

Mr. E aka Teacher

October 29 2020

Lets get this class started!

Eye of the Tiger a feeling of confidence and power

Keep your eye on the prize to remain focused on one's goal

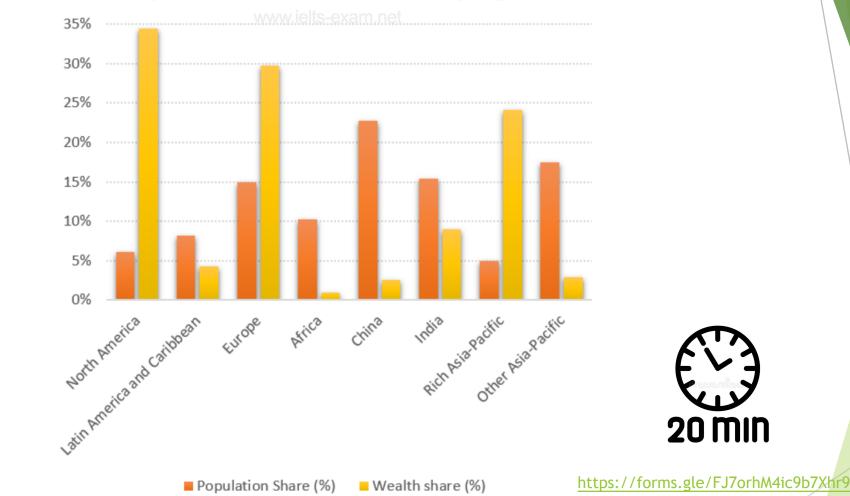

IELTS Writing: Task #1 Tips

- Study the data before you begin to write.
- Make sure you have identified the main aspects of the data (e.g., highest number, biggest change, end goal, name of the process).
- Organise your writing around the main aspects of the data.
- Describe those aspects, referring to the data in detail to illustrate what you are saying.

Population and wealth shares by region

The chart gives information about global population percentages and distribution of wealth by region. Summarize the information by selecting and reporting the main features, and make comparisons where relevant. Write at least 150 words.

Review and Reflect

Model Answer

- The chart compares population shares in various regions of the world with the distribution of wealth in these same regions. It can be seen that wealth is heavily concentrated in North America, Europe, and high income Asia-Pacific countries which together account for almost 90% of global wealth.
- Even though North America has only approximately 6% of the world's population, it boasts nearly 34% of global wealth. A similar situation can be seen in Europe, which has 15% of the global population but 30% of global wealth, and high income Asia-Pacific countries with 5% of the world's population but 24% of its wealth.
- In contrast, the overall share of wealth owned by people in Africa, China, India, and other lower income countries in Asia is considerably less than their population share, sometimes by a factor of more than ten. This is most striking in India, where 16% of the world's population own only 1% of the world's wealth and in China, which has the highest percentage of global population (24%) but only 3% of the world's wealth.
